Lampeter Show 13th August 2010

We will again be supporting Lampeter Show and will have a stand. Please drop in for a chat and refreshment.

Displays will include Worming Sheep and Faecal Egg Counting and Horse Worming and Faecal Egg Counting.

We will be able to identichip (microchip) dogs on the field at our current reduced price (over 20% off).

Have a go at our Charity lucky dip with lots of prizes.

Enzovax Supply 2010

Unfortunately both Enzovax & Toxovax have had some major problems during production this year.

We have an alternative to Enzovax, "Cevac Chlamydia", but this is likely to be in short supply. If you are planning to vaccinate for abortion in the lead up to tugging this year please order now to avoid disappointment.

Toxovax[®] Supply 2010

Intervet/Schering-Plough Animal Health, the manufacturer of Toxovax[®] vaccine, will have difficulty fulfilling all demand for Toxovax this season. This has been caused by an unexpected delay, and they are unlikely to regain full supply until possibly early next year.

The expected shortage means that the practice is likely to have insufficient stocks leading up to tugging.

As an alternative, there is an in-feed medication licensed as an aid in the prevention of abortion due to toxoplasmosis which may be of assistance. Please speak to us for further details.

Intervet/Schering-Plough apologise for any inconvenience this may cause.
