February 2011 Newsletter

Leptavoid H & Bovilis BVD

Intervet have finally had the license update to allow use if both vaccines on the same date. This means that you can now use this combination under license which gives you greater assurance and company back up, if any problem was encountered during, or after, use of both vaccines together.

Bovilis BVD is now back in the wholesalers on controlled supply so we need to know numbers required in plenty of time.

Leptavoid H & Bovilis BVD Combined

* per dose (for 25 dose packs)

Leptavoid H alone

* per dose (for 25 dose packs)

Bovilis BVD alone

* per dose (for 25 dose packs)

Please call to discuss any particular requirements.

Bovilis[®] BVD
Leptavoid[™]-H

* Please telephone for prices

New Vet

We are pleased to announce that we will be joined by an additional Veterinary Surgeon in March. Anne-Marie Davies is from this area and very experienced in all aspects of mixed veterinary practice. We believe she'll be a valuable addition to the practice.

Farming Connect

80% Funding is still available for Veterinary Mentoring. This may be used to investigate a pneumonia problem, lameness, abortions, poor fertility, trace minerals problems etc.

If you would like to receive this support please contact Jim to discuss and we can set the process in motion. More information is available at www.steffanvets.com.
